MATHEMATICS OF THE USSR – SBORNIK

МАТЕМАТИЧЕСКИЙ СБОРНИК

Tom 93 (135) Nos. 1–4, 1974

Volume 22, Nos. 1–4 January–April, 1974 Pages 1–640

INDEX OF AUTHORS

Abdugapparov, A. A. *On rational approximations of functions with a convex derivative* 619

Babin, A. V. *Finite dimensionality of the kernel and cokernel of quasilinear elliptic mappings* 427

Berkovič, V. G. *On the division by an isogeny of the points of an elliptic curve* 473

Bočkarev, S. V. *On the absolute convergence of Fourier series in bounded complete orthonormal systems of functions* 201

Bogatyĭ, S. A. *Approximative and fundamental retracts* 91

Bogomolov, F. A. *On the decomposition of Kähler manifolds with trivial canonical class* 580

Burgin, M. S. *Schreier varieties of linear Ω-algebras* 561

Čirka, E. M. *Expansions in series and the degree of rational approximation for holomorphic functions with analytic singularities* 323

Dobrušin, R. L. *Conditions for the absence of phase transitions in one-dimensional classical systems* 28

Èl′-Huti, M. H. *Cubic surfaces of Markov type* 333

Fadeeva, E. A. *First order hyperbolic equations with constant operator coefficients* 257

Fedosov, B. V. *The analytic formula for the index of an elliptic boundary problem* 61

Feĭnberg, V. Z. See Rabinovič, E. B. and Feĭnberg, V. Z.

Fomenko, V. T. *On the quasicorrectness of the generalized rotation condition in the theory of infinitesimal bendings of surfaces* 49

Gončar, A. A. *A local condition for the single-valuedness of analytic functions of several variables* 305

Gudovič, I. S. *On the method of orthogonal extension of overdetermined systems* 456

Horoševskiĭ, M. V. *On automorphisms of finite groups* 584

Jančevskiĭ, V. I. *Simple algebras with involution, and unitary groups* 372

Krancberg, A. S. *On divergent Fourier series in orthogonal systems* 547

Kurčanov, P. F. *On the rank of elliptic curves over Γ-extensions* 465

Leont′ev, A. F. *On the representation of an analytic function as a sum of periodic functions* 517

Manin, Ju. I. *The values of p-adic Hecke series at integer points of the critical strip* 631

Mazurov, V. D. *On centralizers of involutions in simple groups* 535

Men′šov, D. E. *Application of Cesàro summability methods of negative order to trigonometric Fourier series of summable and square summable functions* 497

Morozov, S. F. *On the existence of discontinuous solutions for a class of multidimensional quasiregular variational problems* 17

Ol'šanskiĭ, G. I. *Interwining operators and complementary series in the class of representations induced from parabolic subgroups of the general linear group over a locally compact division algebra* 217

Oročko, Ju. B. *On the application of spectral theory to obtain estimates of solutions of the Schrödinger equation* 167

Pankov, A. A. *The multiplicative structure and characteristic sets of holomorphic Noetherian operator-valued functions* 603

Polin, S. V. *On the homological classification of small categories* 386

Rabinovič, E. B. and Feĭnberg, V. Z. *Normal divisors of a 2-transitive group of automorphisms of a linearly ordered set* 187

Rozenbljum, G. V. *Asymptotics of the eigenvalues of the Schrödinger operator* 349

Rozendorn, È. R. *Letter to the editor* 150

Šmul'jan, Ju. L. *On closed Hermitian operators and their selfadjoint extensions* 151

Suslin, A. A. *On projective modules over polynomial rings* 595

Taĭclin, M. A. *On the isomorphism problem for commutative semigroups* 104

Vaserštein, L. N. *Stabilization for classical groups over rings* 271

Vladimirov, V. S. *Holomorphic functions with positive imaginary part in the future tube* 1

Vovsi, S. M. *The semigroup of prevarieties of linear group representations* 410

Zvonkin, A. K. *A transformation of the phase space of a diffusion process that removes the drift* 129
